A

SimpleBluetoothTerminal

This Android app provides a line-oriented terminal / console for classic Bluetooth (2.x) devices implementing the Bluetooth Serial Port Profile (SPP)

For an overview on Android Bluetooth communication see [Android Bluetooth Overview](#).

This App implements RFCOMM connection to the well-known SPP UUID 00001101-0000-1000-8000-00805F9B34FB

## Motivation [↗](#)

---

I got various requests asking for help with Android development or source code for my [Serial Bluetooth Terminal](#) app. Here you find a simplified version of my app.
